

Lund Roberts (Engineers) Limited

Covid 19 Statement (Revision F)

28th April 2020

Lund Roberts (Engineers) Limited is committed to operating responsibly and in compliance with all government guidelines. As a member of the construction sector, we are permitted to undertake electrical works which obviously cannot be undertaken remotely. At this juncture, it is however our declared policy to support emergency works only, whilst protecting our workforce, our clients and members of the general public. Lund Roberts (Engineers) Limited has therefore implemented the following measures to assist in curtailing the Covid-19 threat:

1. We suspended all non-essential site works from 24th March 2020 in order to reduce personnel movement. Emergency works and essential reactive maintenance visits remain on offer to clients giving due consideration to the widely publicised self-isolation rules (including best practice restrictions travelling to and from work).
2. We have nominated office-based personnel working from home since 24th March 2020, and for the duration of the nation-wide lockdown. Communication continues between our senior management team and all staff via telephone, video conferencing, email and project specific WhatsApp groups.
3. The temperature screening of all personnel (directly employed and sub-contract) is requisite every working day. Temperature measurements are self-declared to a central Covid-19 WhatsApp group prior to leaving home, on attending any site and during each working shift on that site. These procedures are regularly reviewed by senior management and will remain in place until further notice.
4. Health and travel screening forms are completed by all personnel on arrival at any site and prior to entering that site. Directly employed and sub-contract personnel who have been abroad, who are reporting or appearing to display symptoms of Covid-19 will be instructed to stay at home for 14 days. If they live with someone who has symptoms, they will be instructed to stay at home for 14 days.
5. When at work, all directly employed and sub-contract personnel shall implement "Social distancing," as defined in the government guidelines (2 meters).
6. Where works have been undertaken or are planned, additional PPE in the form of surgical masks, gloves and safety glasses / visors, shall be provided and must be worn by all team members.
7. Other protective measures include the provision of alcohol-based hand sanitizer and wipes, the use of private vehicles instead of public transport where possible, phased shift patterns, and staggered arrival, break and exit times.
8. We continue to electronically issue toolbox talks, training and information to all our staff, to ensure that they have the most up to date information and can behave in a safe, considerate and responsible way. We are keeping up to date with NHS, public health England and government guidelines via media streams and press releases.
9. All personnel shall be encouraged to utilize government tracing apps when launched.
10. Lund Roberts (Engineers) Limited report no known internal cases of Covid-19 to date.

This Policy is communicated to all employees, suppliers and sub-contractors, and will be updated as new information becomes available.
